SKILLS & OTHER

Languages: Python (9 yrs) · SQL (5 yrs) · JavaScript (3 yrs)
AI / ML: AWS Bedrock · PyTorch · Scikit-learn · BERT · CNN/RNN · NLP Pipelines · Feature Engineering
Frontend & Backend: React · Next.js · FastAPI · Flask
Cloud & DevOps: AWS (EC2, EMR, S3, Lambda, Bedrock) · GCP (BigQuery) · Vercel · Docker · GitHub Actions
Hobbies and Interests: Tennis, Table Tennis, Guiter

WORK EXPERIENCE

Eastern TV Broadcasting LLC | *Web Developer* **Jun 2025 – Present**

- Replaced manual multi-platform video publishing with an automated script supporting **one-click multi-platform** upload and resumable uploads, eliminating recurring upload interruption issues.
- Deployed and configured cloud environment supporting **up to 50** concurrent video upload/download users.
- Designing an **AI Agent** to automatically generate video descriptions and tags from video metadata, reducing content production overhead (in development).

Walmart – Warden Data Team | *Data Engineer* **Jan 2025 – May 2025**

- Designed and built production-ready data lineage pipelines to track data flow across internal systems for the Warden cybersecurity team.
- Collected cybersecurity vulnerability data from NVD and generated structured metadata in **GCP BigQuery.**
- Developed **interactive Dash dashboards** surfacing pipeline metrics and NVD data trends for the engineering team.
- Collaborated with cross-functional engineering teams on data infrastructure management and best practices.

Happy Programming | *Programming Instructor* **Jun 2024 – Dec 2024**

- Taught three progressive courses (Python Beginner, Python Advanced, AI/ML) to students in grades 7–12.
- Designed hands-on project-based curriculum that guided students building their first ML project.
- Provided one-on-one technical mentoring and feedback; organized end-of-term project presentations.

PROJECTS

AI-Powered Personal Portfolio with Conversational RAG Assistant **Dec 2025 – Present**
Stack: **Next.js · FastAPI · Python · AWS Bedrock · Vercel | sun-jason.com**

- Built and deployed a website via Vercel, architecture with an embedded AI chat assistant for HR Q&A.
- Designed a RAG pipeline injecting a Confluence-derived Markdown knowledge base as request-level context.
- Enforced responses grounded in verified content using jailbreak-resistant system prompts.

Church Library Full-Stack Management System **Nov 2024 – Aug 2025**
Stack: **React · Vite · Flask · PostgreSQL · RESTful API | www.churchlibdl.org**

- Built a full-stack library management platform serving 500+ registered users with a catalog of 5,000+ books, supporting self-service borrowing, returns, and renewals.
- Developed a decoupled React (Vite) frontend and Flask backend with RESTful APIs, deployed on Heroku.
- Implemented email verification, password reset, and due-date reminders using Flask-Mail and APScheduler.

Large-Scale Distributed NLP Analysis System **Sep 2022 – Jan 2023**
Stack: **Python · AWS EC2/EMR · Spark · Hadoop · Scikit-learn**

- Built a distributed NLP pipeline processing 21M+ Reddit comments to study topic-sentiment relationships.
- Optimized Spark resource allocation (executor memory, parallelism) to improve throughput; designed scalable batch architecture on AWS EMR.
- Trained and benchmarked GBDT and Random Forest models using Accuracy, Precision, Recall, and F1.

EDUCATION

Georgetown University **Sep 2021 – May 2023**

- **M.S. Computer Science**

ShanghaiTech University **Sep 2017 – Jul 2021**

- **B.Eng. Computer Science**
